

Charter Council Meeting

Tues Sept 17, 2024

Maple Rose Kindergarten

It's almost Autumn-time, time to call forth our courage, against challenges we face as well as our own inner struggles. We are experiencing this implicitly in the Kindergarten classroom with our story of a brave herder who must overcome many obstacles to slay the 12-headed dragon. Of course we always have helpers nearby...

Help comes in many forms; a few may be kind friends, supportive family, wholesome food, and artistic practices...

Now we have met all three colours at painting time.

Grade 1 ~ Ms Hunter

First grade is enjoying learning their letters! We've discussed M, short A, S, T, P, and N.

Our daily work in main lesson books and painting on Tuesdays have been bringing great joy!

GRADE 3

In Third grade, we have begun working in the garden! The students have loved clearing the beds, mixing soil, and planting lettuce and broccoli. We can't wait to see what develops and we are glad to be able to contribute to the beauty of our school.

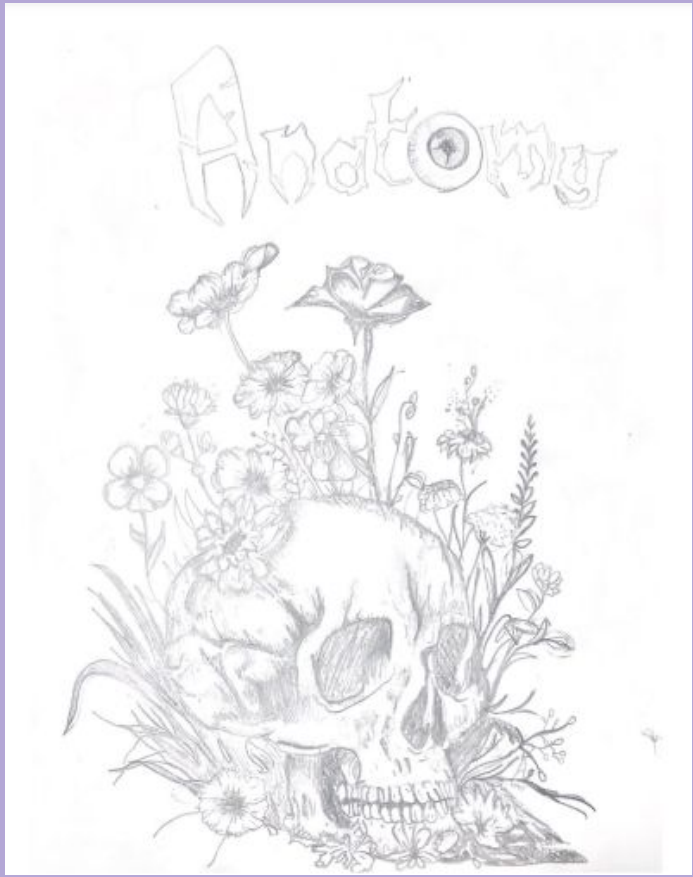

4th Graders are reading the novel, [The Iron Dragon Never Sleeps](#), in ELA which is about a girl from Old Sacramento whose father is a miner and the Chinese immigrant railway workers she befriends on the frontier. We visited The California Railroad Museum and enjoyed caramel apples! Children panned for gold, explored tools in a replica hardware store, and enjoyed history brought to life on the wooden plank pathways, Victorian architecture, and marvelous trains! The trains are so grand in real life and really do feel like dragons on earth!

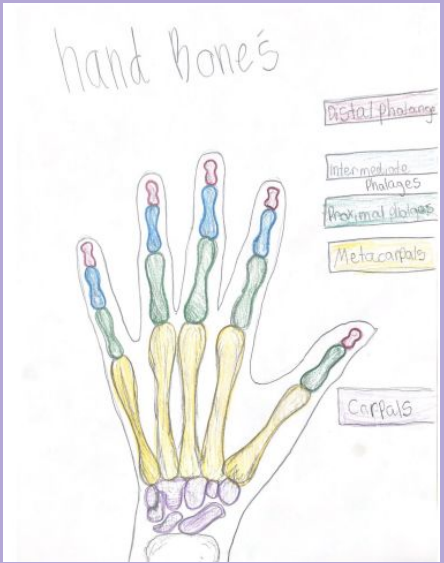

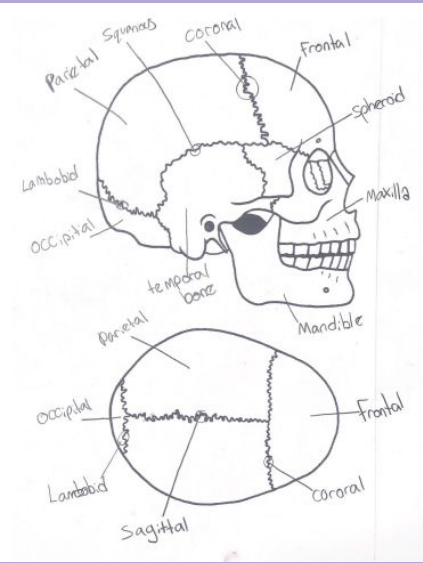

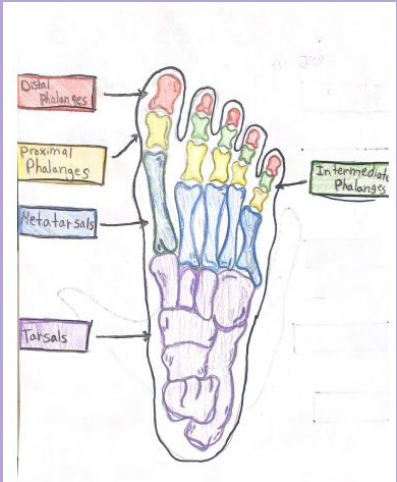

Ms. Lee Grade 7

Geology and playing with Physics

8th Grade
 is studying
 Anatomy. We
 start this block
 studying bones

Lower Grades Handwork with Miss Claire

Third grade is doing incredibly well with their weaving projects! And handwork club is going very well. Lots of beading and free choice projects. Most students in first grade have finished their knitting needles and are starting to knit. I've been trying to recruit parent helpers and upper grade students to help get us started, but it's been challenging to get the help we need.

Intervention/ ELPAC/Accelerated Math
